

COMPLIANCE DECLARATION: ENVIRONMENT

Activities related to the manufacture and delivery of Riantics' products and systems naturally have an impact on the environment. In all of our actions, we observe the Danish and European environmental legislation. Riantics' environmental procedures are based on the principles in the international standard ISO 14001:2015, and furthermore, we strive at always having the below aims in mind:

- To limit the resource consumption and thus reduce the volume of waste and pollution
- To apply work- and environmental-friendly materials
- To apply products suitable for reuse or recycling
- To continuously improve the overall environmental efforts of the company
- To inform and train our employees to act environmentally responsibly and to actively live up to our environmental targets
- To inform about our influence on the environment and the results of our environmental efforts, internally and externally

When working on site, it is part of our conduct to:

- Dispose of our own surplus materials and waste – or to agree with a department manager to use the on-site waste system according to the internal rules.
- To protect the environment, we make as few transports as possible and apply environmentally sound products for manufacture and packaging.

Additionally, we work on a continuous basis to develop our core products, not least with the aim of improving their energy efficiency.

Date: 18 April 2018

Hans-Henrik Jensen
CEO of Riantics A/S
